CheckSum Signs Distribution Agreement with CPS in Poland

Arlington, WA—November 6, 2008—CheckSum today announced that CPS-IEP (Chip Placement Solution Industrial Engineering Poland) Company will sell, install and service CheckSum products in Poland.

The distribution agreement covers all CheckSum products and services, including the successful, high-speed MultiWriter ISP device programming system and the popular, low-cost Analyst in-circuit test systems.

CPS-IEP has already sold and installed an Analyst ems 12KN tester into a major manufacturer of lighting products in Poland.

“CPS-IEP is experienced and successful at selling SMT equipment to major EMS providers and OEMs operating in Poland,” said John VanNewkirk, president & CEO of CheckSum. “By working with them, we look forward to expanding our customer base in the growing PCB assembly industry in Poland.”

“We’re excited about selling CheckSum’s products, especially the innovative MultiWriter ISP programming system,” said Mirosław Rozwadowski, president of CPS-IEP. “CheckSum products are a perfect complement to our current product line and offer great technology and economic value to our customers.”

About CheckSum

Based in Arlington, Washington, CheckSum is a leading supplier of ISP device programming solutions and low-cost circuit board test—including systems, fixtures, and programs—to the electronics manufacturing industry. CheckSum has been delivering reliable, cost-effective, and flexible test solutions to OEMs and contract manufacturers for 20 years. With an installed base of over 3,000 test systems at more than 200 companies in over 40 countries, CheckSum helps customers ranging from automotive electronics manufacturers to global EMS providers reduce their total test and manufacturing costs and increase their manufacturing margins. About CPS

CPS-IEP Company was founded in 1998. The company sells, installs and services SMT machines. It is systematically expanding by opening new branches in Poland and abroad. Currently the company sells and services Fuji, Speedline, CheckSum, Takaya, Goepel, Pillarhouse, Rommel and Purex machines. CPS-IEP provides both warranty and out-of-warranty service and offers spare parts and consumable supplies. Qualified engineers carry out machine operation and technological process training. Responding to customers' expectations, CPS-IEP decided to sell antistatic materials from KVT-Canespa. Major customers include Jabil, Philips, Flextronics, Kimball, and Lacroix. Currently one of the most experienced companies in Poland, CPS-IEP provides proven and economical high-tech solutions. The company's long-term experience has allowed it to become the unchallenged leader in sold and installed machines in the SMT market. For more information, visit www.cps.com.pl.
