## **Covenant UltraTech to Distribute CheckSum Products in the Philippines**

**Arlington, WA—November 24, 2008**—CheckSum today announced that Covenant UltraTech, a division of the Covenant Group, will sell, install and service CheckSum products in the Philippines. The distribution agreement covers all CheckSum products and services, including the successful, high-speed MultiWriter ISP device programming system and the popular, low-cost Analyst in-circuit test systems.

Covenant UltraTech has already sold a CheckSum system to a global contract manufacturer based in the Philippines.

“Covenant UltraTech is a leading supplier of PCB assembly equipment to electronics manufacturers in the Philippines,” said John VanNewkirk, president & CEO of CheckSum. “Partnering with them will help us reach and serve customers in the growing PCB assembly market in the Philippines.”

“We’re pleased to offer our customers CheckSum’s products, especially the innovative MultiWriter ISP programming system,” said Nor San Juan, president of Covenant UltraTech. “CheckSum products expand our current product line and offer innovative technology and economic value to our customers.”

**About CheckSum**

Based in Arlington, Washington, CheckSum is a leading supplier of ISP device programming solutions and low-cost circuit board test—including systems, fixtures, and programs—to the electronics manufacturing industry. CheckSum has been delivering reliable, cost-effective, and flexible test solutions to OEMs and contract manufacturers for 20 years. With an installed base of over 3,000 test systems at more than 200 companies in over 40 countries, CheckSum helps customers ranging from automotive electronics manufacturers to global EMS providers reduce their total test and manufacturing costs and increase their manufacturing margins.
